

# MINI-DUCTOR® COIL GUIDE

Check out this quick guide to inserting and securing coils in your Mini-Ductor units.

## STEP 1 -

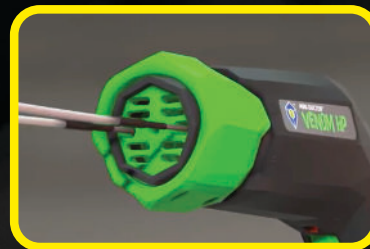

Turn the twist-lock to the unlocked position.  
(For the Mini-Ductor Venom® and HP)\*

\*For the Mini-Ductor II and 12V, make sure the thumb screws are loosened.

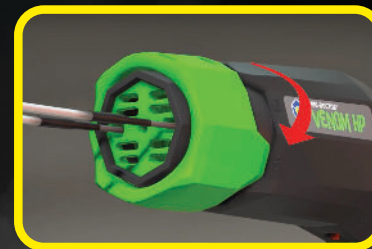

## STEP 2 -

Insert the coil leads into the correct holes.

## STEP 3 -

Push the leads ALL the way in before locking them in place.

## STEP 4 -

Turn the twist-lock to the locked position.\*

\*For the Mini-Ductor II and 12V, twist the thumb screws at the same time to secure the coils.

**NOTE - Do not operate unit unless coils are locked in place**
