Cart optional

The **Inductor ALFe 3.5** (IC-3500) induction heater delivers safe, precise and reliable heat. The ALFe 3.5 is ideal for repair shops that require high-end heat levels to release seized parts and panel bond adhesives from steel or aluminum.

ALFe 3.5 Applications

- > Bolts
- > Graphics
- > Auto Glass
- > Stress Relieving Frame Rails
- > Annealing Metals
- > Fabrication

The **Inductor ALFe 5.0** (IC-5000) induction heater heats steel and aluminum faster, safer and more precise than a torch. ALFe 5.0 heats metal parts to the required temperatures all while saving time, consumables and salvaging parts normally discarded in the repair process.

ALFe 5.0 Applications

- > Shrink-fitting
- > Hardening
- > Curing
- > Graphics
- > Straightening
- > Annealing
- > Bearings
- > Spray-in Bedliners

Attachments included with ALFe 3.5 and ALFe 5.0

Flow Concentrator

- > Bearings
- > Bolts
- > Shock Absorbers

Glass Blaster

- > Auto Glass
- > Windshield
- > Bedliners

Fast-Off

- > Adhesives
- > Graphics
- > Emblems
